

PlantTech: Asset Integrity Management

Safeguarding your plant integrity, safety and reliability by examining maintenance execution, planning and scheduling to achieve longer asset life

Prince Hotel & Residence,
Kuala Lumpur

24th & 25th May 2010

Exclusive 10% discounts only for our Endorser for this event, Thai Electrical & Mechanical Contractors Association (TEMCA):

Featuring a half-day course on

Reducing equipment failures through effective use of Root Cause Analysis (RCA)

Facilitated by:

Stephen W. Ciaraldi Former BP ASPAC Integrity Management Technical Authority
BP Asia-Pacific

Stephen Ciaraldi, Ph. D., is president and lead consultant for Technical Integrity Solutions, PC, a newly formed corporation specializing in oil, gas and pipeline integrity, materials and corrosion engineering. He has 30 years experience with Amoco and BP in a variety of integrity management roles. Throughout his career, he has been involved with facilities troubleshooting and failure analysis, including root-cause methods, for wells, topsides equipment, structures, pipelines, gas / oil processing plants and export systems.

"If you have integrity, nothing else matters. If you don't have integrity, nothing else matters"

Alan Simpson

It is essential for plant operators and managers to achieve efficient asset utilisation on a long-term basis while minimising the risk of failures in plant operations and maximising plant reliability through excellent maintenance procedures

marcusevans

Your honorary chairperson:

Stuart McWilliams Vice President Asset Management
Senoko Energy

Senoko Energy is Singapore's largest power generation and retail company that first set the industry's best safety record of 3,000,000 man hours without lost time injury in October 2009

Featuring a distinguished panel of speakers:

Mark Brunner Reliability and Systems Superintendent

OneSteel Rod, Bar and Wire

OneSteel is a fully integrated, global manufacturer and distributor of steel and finished steel products, with revenues in excess of \$6 billion Australian dollars

Dr Alex Smillie Vice President

Geothermal Operations, Star Energy

Dr Alex's past experience includes working in Europe, Africa, Middle East & Asia Pacific

Lokesh Bhardwaj Head - Reliability Section

Abu Dhabi Gas Industries (GASCO ASAB)

Formerly worked for GE Energy (Bently Nevada - Bahrain and India), SABIC-Saudi Arabia, PDO-Oman, Chambal Fertilisers - India

Mohamed Daoud Team Leader (Quality Control), Engineering & Major Projects (EMPD)

Abu Dhabi Company (ADCO)

Mohamed Daoud has extensive experience within the oil & gas industry specialising in project management, construction, quality assurance and control, integrity management, inspection and certification of manufactured equipment

Roddy Evans Former Global Manager - Maintenance & Reliability

BHP Billiton

Roddy has extensive global experience of leading major change programs to achieve world class maintenance and integrity performance

Anthony D. Nguyen TECO VP of Engineering

Tri Energy Company Limited

Tri Energy Company Limited is Thailand's first and largest Independent Power Producer and Chevron has a 50 percent interest in Tri Energy Company Ltd's power plant

Ngo Ding Long Maintenance & Integrity Manager

BP Vietnam

Martono National Manufacturing Services Manager

PT Coca-Cola Bottling

Coca Cola was listed number 10 in the 'world's most admired companies' from Fortune, March 2010

Key benefits and learning outcomes:

- **Strengthening** plant assets and dynamics of reliability through best practice implementation of asset integrity management
- **Determining** the most appropriate ways to achieve maintenance objectives through long-term machinery maintenance and asset replacement strategies
- **Realising** the importance of ensuring current assets are aligned with the latest technology to completely optimise assets
- **Discussing** the limitations of techniques currently used to improve plant reliability while outlining an alternative approach to effectively identify and manage asset integrity risks
- **Gaining** exposure to current and emerging trends in asset maintenance and reliability
- **Addressing** best practices of maintaining the lifecycle of your machinery while decreasing long term operating expenses
- **Networking** and **brainstorming** with plant and asset leaders across the industries in a setting that cultivates dialogue and discussion
